## MEET YOUR PROJECT MANAGER AND TEAM LEADER

### 1 BRIAN PLATT, CTO

#### PROJECT MANAGER

Brian joined FDC in May 2016. Brian has over ten years' experience in the FX industry managing complex technology and business operations. His expertise includes advanced technical knowledge of databases, programming, and product development lifecycles as well as a clear understanding of business needs. Brian's passion is combining this business and technical knowhow to assure the best products, client satisfaction, and optimization of human resources.

Prior to joining the Company, Mr. Platt was the head of technology at Fortress Capital Investments, UAE, from June 2014 to January 2016, where he was

instrumental in starting a forex broker from the ground up, introducing the trading platform, connecting liquidity; add on services such as money management PAMM systems, and a compliance reporting.

From May 2011- February 2014 Brian served as the Director of Risk Management and Operations Research at Boston Technologies. His major accomplishments include developing advanced procedures to eliminate trade risk, streamlining accounting operations, revamping client reporting, integrating new revenue streams, and providing comprehensive analytics.

Before joining Boston Technologies, Brian managed the Operations Research department at CMS Forex from March 2006 through May 2011. In this role, he coordinated all business intelligence

efforts, identified and automated manual operations, and facilitated new business initiatives. Brian organized the operational elements of the sale of CMS Forex to Gain Capital, and subsequently revamped the company to utilize existing resources as a profitable self-sufficient IB business. Brian holds a degree in Information Systems from Yeshiva University. He has computer science training from New York University and Oracle DBA training from Farleigh Dickenson University.

## AVOID COMPLEXITY AND TRANSFORM YOUR BUSINESS BY USING OUR CUSTOM DEVELOPMENT EXPERTISE

### 2 PAVEL BRONNIKOV, VP

#### TEAM LEADER

Mr. Pavel Bronnikov has over ten years of software development and managing software development projects. He has expertise in both backend and front end development using C#, java, scala, c++, delphi, php, NET, Javascript, angularjs and much more. Pavel's specific focus has been in the forex industry leading numerous projects including Low Latency, High Performance trading systems, and Big data analytics tools.

Pavel joined FDC in August 2016 as the team lead and manager of a development team in Chelyabinsk, Russia. He manages software development projects, IT support team and all other IT related questions at FDC. Along with his talented team of developers Pavel has built and continues to improve a multi-language back office reporting portal site for the MetaQuotes MT4 trading platform, trading system synchronization tools between MT4 and other trading platforms, and CRM systems. The team is also taking custom outsource development tasks for various forex and binary options companies.

Before joining FDC, Mr. Bronnikov was head of Chelyabinsk Department of Centre-IT company and managing all software development projects for this department including built developing employee management software for the Russian government offices.

From March 2013 to October 2013, Mr. Bronnikov setup and manage remote software development office For Boston Technologies Company. The team worked on improving the company's global database systems aggregating data from over ten MT4 servers and 100+ liquidity bridges. The team significantly enhanced the overall system backend performance as well as the reporting tools available internally to accounting, sales, and risk management as well as to clients.

In February 2005 Pavel started as a junior developer at Traders Development Company and grew to become head of software development department until March 2013. He built a full-stack Forex trading system, including the trading terminal, backend Trades Processing, Back Office reporting, and bank liquidity connections.
