INTRODUCTION

-

Anton joined FDC in March 2016 as the software developer with our team in Chelyabinsk, Russia. He manages software development projects, IT support team and all other IT related issues. He became the team leader of project development in June 2018.

Anton has over ten years of software development and managing software development projects. He has expertise in both back-end and front-end development using C#, java, scala, c++, delphi, php, NET, Javascript, angularjs, and much more. Anton's specific focus has been in the forex industry, where he led numerous projects, including the development of low latency, high-performance trading systems, and big data analytics software.

BIO SUMMARY

-

Anton has managed software development projects and leads the technical support team at FDC. Along with his talented team of developers, Anton has built multi-language back-office reporting portal site trading platforms and CRM systems.

Anton is leading the FDC team on custom development tasks for various forex and crypto brokers.

Anton has expertise in the development of CRM and ERP software for large multinational companies. Anton has developed full-stack applications for forex businesses, including but not limited to CRM, on-boarding, KYC, accounting, notification, back-office, and web trader. Anton received his Master degree in System Design from South Ural State University in 2005.
