INTRODUCTION

-

Mr. Bronnikov joined FDC in August 2016 as the team lead and manager of a development team in Chelyabinsk, Russia. He manages software development projects, IT support team and all other IT related issues.

Mr. Bronnikov has over ten years of experience in software development and managing software development projects. He has expertise in both backend and front-end development using C#, java, scala, c++, delphi, php, NET, Javascript, angularjs and much more. Pavel's specific focus has been in the forex industry leading numerous projects including Low Latency, High Performance trading systems, and Big data analytics tools.

BIO SUMMARY

-

Before joining the Company, Mr. Bronnikov was head of Chelyabinsk Department of Centre-IT company and managing all software development projects for this department including built developing employee management software for the Russian government offices.

From March 2013 to October 2013, Mr. Bronnikov setup and manage remote software development office For Boston Technologies Company. The team worked on improving the company's global database systems aggregating data from over ten MT4 servers and 100+ liquidity bridges. The team significantly enhanced the overall system backend performance as well as the reporting tools available internally to accounting, sales, and risk management as well as to clients.

In February 2005 Pavel started as a junior developer at Traders Development Company and grew to become head of software development department until March 2013. He built a full-stack Forex trading system, including the trading terminal, backend Trades Processing, Back Office reporting, and bank liquidity connections.
